

Clinical Medical Assistant Training Program

This noncredit program prepares medical assistant students to perform patient clinical skills in the medical office setting. Students perform clinical procedures including administering medications, assisting with minor surgery, performing an electrocardiogram, obtaining laboratory specimens for testing, educating patients, and maintaining clinical equipment in an ambulatory care setting. Medical assistants perform routine clinical tasks to keep the offices of physicians, podiatrists, chiropractors, and optometrists running smoothly. **Classes available SPRING 2018 at Walker Career Center, Indianapolis.** *This program is offered in cooperation with the Metropolitan School District of Warren Township.*

Clinical duties may include taking medical histories and recording vital signs, explaining treatment procedures to patients, preparing patients for examination, and assisting the physician during the examination. Medical assistants collect and prepare laboratory specimens or perform basic laboratory tests on the premises. They instruct patients about medication and special diets, prepare and administer medications as directed by a physician, authorize drug refills as directed, telephone prescriptions to a pharmacy, draw blood, prepare patients for x-rays, take electrocardiograms, and change dressings.

Employment & Education

Upon successful completion of the Clinical Medical Assistant program you will have the skills necessary to gain employment in a number of capacities. Job opportunities will be prevalent in physicians' offices, clinics, chiropractors' offices and outpatient facilities. The occupational outlook handbook states that employment of medical assistants is expected to grow 29 percent from 2012 to 2022 much faster than the average.

Educational requirements

People who are interested in becoming a Clinical Medical Assistant must possess a high school diploma or GED/HSE.

Course curriculum

This program will provide the necessary training and skills required to take the National Healthcareer Association (NHA) Certified Clinical Medical Assistant (CCMA) national examination. This 220 hour program includes 140 classroom hours (lecture and labs) and an optional 80 hour clinical externship. Students must successfully complete the 140 hour classroom requirement to be eligible to participate in the 80 hour clinical externship rotation. Additional externship hours available upon request. Although the externship is optional, students are highly encouraged to participate in the workplace experience for best employment opportunities. This comprehensive Clinical Medical Assistant program provides training in the following areas:

- function of the clinical medical assistant in an office
- introduction to health care facilities
- medical terminology
- anatomy of each of the body parts
- care & safety of patients
