Allure Transitional Shades

Allure Transitional shades can transform from light filtering to total room darkening with Sundown.

Visionaire™ offers a vertical orientation of Transitional Shades and a great solution for patio doors.

Dare to be different with Allure Transitional Shades designed with a unique curve shaped vane.

**Child Safety is Serious Business**

Corded window coverings do present a potential strangulation hazard for young children and pets. In response to this threat, the window covering industry has tightened its safety standards and created warning tags and labels to alert parents to this hazard.

Together with the Window Coverings Safety Council we encourage you to install only cordless window coverings in rooms where young children play and sleep.

We offer several lifting systems that are especially appropriate for families with young children. The Sure-Lift® system operates safely with a wand or retractable cord designed to stay out of the reach of small children. A variety of motorized systems also provide the ultimate in easy operation with no exposed cords.

Couplitaire™ pairs Transitional Shades with a room darkening roller shade for ultimate privacy and light control.

Room Dimming fabrics designed to keep your private life private.

Allure Transitional Shades and coordinating Genesis® roller shades and panel track shades play nicely together.
