Genesis®

A New Beginning for the Original Window Shade

It began with the window shade, but Genesis has evolved to include roman shades and panel track to provide you exceptional light control with functional flair.

Environmentally Compatible

You'll find many "eco-friendly" window fashion products to satisfy ecological concerns without sacrificing style.

Maintain your privacy while still enjoying the view with optional Top Down/Bottom Up operating system.

Opacity

The amount of light control and privacy varies with the pattern and color selected. You can softly diffuse the light or completely block it out with a range of five opacity levels.

Specialties

Cover uniquely shaped windows including arches and angles with Roman Shades. Extra large windows can be handled with multiple shades on one headrail that open or close separately for versatile light control.

Versatility

Window shades have come a long way from the standard roller with the addition of roman shades and panel track. Optional operating systems add even more flexibility and function. You can even operate your shades at the touch of a button with motorization.
